

Michelangelo Conserva

"We know the past but cannot control it. We control the future but cannot know it."

- Claude Shannon.

Mail: m.[lastname]@qmul.ac.uk

Webpage: <https://michelangeloconserva.github.io>

Address: Second floor, Empire House, 67-75 New Rd, London E1 1HH, United Kingdom

Interests

My principal objective is to develop practical methodologies with a strong theoretical backing for sequential decision making under uncertainty.

Education

Ph.D., *Queen Mary University of London*, United Kingdom, **Sep. 2020 -**
Reinforcement Learning

Master of Science, *University College London*, United Kingdom, Distinction. **Sep. 2019 - Sep. 2020**
Computational Statistics and Machine Learning

Bachelor of Science, *Sapienza University of Rome*, Italy, 110 cum laude/110. **Sep. 2016 - Jul. 2019**,
Statistics, Economics and Finance

Selected Publications

Journal

- **Conserva, M.**, Deisenroth, M.P. and Kumar, K.S., 2022. The Graph Cut Kernel for Ranked Data. *Transactions on Machine Learning Research*.

Projects

Total War Simulator. **Jun. 2020 - Jan. 2021**

- The Total War Simulator is a research project that aims to reproduce battles from the Total War game series for reinforcement learning agents training.
- The latest version is implemented in Unity with an earlier version available for Python.
- The simulator includes melee and ranged units, human control and AI Python interface using Unity MLAgents toolkit.

Deep Briscola. **Dec. 2018 - Mar. 2019**

- Deep Briscola is a research project that explores the effectiveness of state-of-the-art reinforcement learning agents to play the Italian card game of Briscola.

Learn to Read to Read to Learn. **Jan. 2020 - Mar. 2020**

- Group project for Natural Language Processing module of my MSc at UCL.
We explored a novel architecture for a contextual bandit with natural language context.

FinancePy. **Apr. 2018 - Nov. 2018**

- FinancePy is a data scraper for financial data from Morningstar, Yahoo Finance and Quandl that also includes simple time series analysis tools.

Awards and extra-curricular activities

- *Nuffield Research Placement*. Mentoring a high school student (now studying Computer Science at Imperial College London) coming from a disadvantaged background.
- Secured four years PhD funding.
- Volunteering at local youth association "Giovani Tiburtini" to support homeless people with food and company.
- *Giochi di Anacleto*, high school physics Olympics: classified 1st (2015) and 3rd (2014).

- High school math Olympics: classified 1st (2015).

Technical Skills

Programming languages: PYTHON, R [Advanced] C, C++, JAVA, MATLAB [Intermediate]

Python libraries: Pytorch, Tensorflow, Jax, Scipy, Pandas, scikit-learn, Matplotlib, NetworkX

Soft skills: effective communication, clear presentation, team-work, pressure handling

Relevant Coursework

- Reinforcement learning
- Statistical modelling
- Dynamical systems
- Mathematical finance
- Approximate Bayesian inference
- Stochastic processing
- Convex optimization
- Deep learning
